OBJECTIVE

1. My main object is to build the backend logic of project development using the leading framework Spring Boot.

2. Designing and implementing scalable, high performance backend architecture to meet the complex business requirement.

3. Creating secure and efficient RESTful APIs to enable seamless communication between frontend and the backend.

4. Ensures code quality through the unit, Integration testing.

CERTIFICATION

1. **Programming in Java IIT Kharagpur**   Percentage :- 82%
2. **Programming in python Dibrugarh university**   Percentage :- 92%

PROFILE

- As an aspiring Java backend developer, my primary goal is to construct the backend logic of project development utilizing the prominent framework Spring Boot.

- My objectives also include designing and implementing a scalable, high-performance backend architecture to fulfill intricate business requirements.
- Additionally, I aim to create secure and efficient RESTful APIs to facilitate seamless communication between the frontend and backend systems. Moreover, I prioritize ensuring code quality through rigorous unit and integration testing.

- Currently pursuing a BCA degree, I envision myself as being enthusiastic and self-driven, with a strong proficiency in Java programming. I have undertaken several mini projects utilizing the Spring Boot framework to enhance my skills.

- My focus lies in backend development, specifically working with RESTful APIs. I am actively seeking an internship opportunity that will allow me to apply my knowledge in a practical setting, continue to develop as a developer, and gain valuable work experience.

EDUCATION

- **10th Passed from Maharashtra State Board with 83%**
- **12th Passe from Maharashtra State Board (Division- Mumbai) with 64.31%**
- **BCA from Bharti Vidyapeeth University Pune with 9.15 SGPA**

SKILLS

- Spring Framework
- Spring Boot
- HTML, CSS, JavaScript
- Python
- Logical Programming
- Backend logic development
- .NET Framework (C#)

Project

- **Student Management System (RestAPI)**
